DAYWISE · ADMIN DESIGN SYSTEM · V1

Quiet, exact, and built to be read in a hurry.

The admin app travel agents use to draft, edit and share day-wise itineraries. Hierarchy comes from Inter's size and weight, not colour. Surfaces are flat and separated by hairlines. Indigo is spent once per screen. Photography carries the warmth.

Missing photo

Photos may be imperfect Google uploads. object-fit: cover, centred. While loading or missing, the slot shows one of four grounds (sand, sage, slate, clay, rotated by index) with the place name bottom-left, so it still says where. Never a broken-image glyph.

Never do

The short list that keeps this from turning into a template.

1. No sidebar, no stat cards, no icons in coloured circles.
2. No dashed empty states, no illustrations.
3. No gradients, no glassmorphism, no photo overlays.
4. No text over photos.
5. No pure black, no pure white.
6. No pills, except initials.
7. No radius above 10px.
8. No shadow except shadow-float on floating layers.
9. No second accent; no indigo headings or decoration.
10. No colour as the only signal: every status has a word.
11. No weight 700, no italics, no positive tracking outside labels.
12. No emoji, no exclamation marks, no named or chatty AI.
