DAYWISE · CLIENT ITINERARY PAGE · SYSTEM EXTENSION

The same discipline, wearing the agency's colours.

The page a customer opens from WhatsApp is the agency's sales document. It keeps the admin system's Inter, warm paper, hairlines and fixed photo frames, and swaps indigo for one colour the agency chooses. The platform is never named on it.

Tenant colour

One colour per agency, set in Settings. Must reach 4.5:1 on the paper; bright tones are darkened or rejected.

THE COLOUR MAY TOUCH

- The agency wordmark and logo tile
- One 1px rule under the header, one above the footer
- Day numbers, and the current day in the index
- The WhatsApp button, the only filled shape
- Links in the contact block

NEVER

- A background, band, card or section fill
- Over or tinting a photo
- Headings, body text, prices or times
- Two filled buttons on one screen
- A second agency colour or a gradient

New tokens

Everything else is inherited from the admin system unchanged.

TOKEN	VALUE	USE
tenant-accent	agency hex	Wordmark, rules, day numbers, WhatsApp button, current index day. Validated ≥ 4.5:1 on surface.
on-tenant-accent	#F7F5F1	Text and icon on the WhatsApp button.
tenant-rule	1px tenant-accent	Under the header and above the footer. Elsewhere rules stay line.
paper	#F7F5F1 / #FFFFFF	Screen keeps surface; print uses white paper.
reading-column	720px	Desktop text and day column.
photo-column	880px	Desktop hero photos may run wider than text.
gutter-mobile	20px	Client page side gutter at 390 (admin uses 16).

bar-height	64px + safe area	Sticky bottom bar on mobile.
index-height	44px	Slim sticky day index.
section-gap	64px m · 96px d	Between days and major sections.
print-margin	15mm · 57px	All A4 page edges.
print-body	10.5pt · 14px	Stop lines, terms.
print-caption	9pt · 12px	Footer, photo credits, captions. Nothing smaller.
print-photo	hero 1200×800 · hotel 800×600	JPEG re-encode targets for the PDF.
